

ABSTRACT OF THE DISCLOSURE

A glove retained by retaining means ~~is~~ enabled to be  
donned onto a hand by: providing gloves GR in which a cuff  
edge 8<sub>D</sub> of a glove palm side part is formed to be offset  
5 closer to the glove fingers compared with a cuff edge 8<sub>U</sub>  
of a glove back side part; hanging the gloves GR by  
engaging an upper portion of the glove back side part  
located in the vicinity of the upper cuff edge 8<sub>U</sub> and  
above the lower cuff edge 8<sub>D</sub>, with the glove cuff being  
10 directed upward and the palm side part with a lower cuff  
edge 8<sub>D</sub> being placed in front; opening the cuff of the  
foremost one of the gloves to an extent sufficient to  
enable the hand to be inserted therethrough; and applying  
a force to the glove to disengage the glove after  
15 inserting the hand through the opened cuff from above.
